Year 1

- D1.1 NESSoS JVRL Web Portal
- D1.2 NESSoS Joint Virtual Research Lab
- D2.1 First Release of Method and Tool Evaluation
- D2.2 First Release of the SDE for Security-Related Tools
- D3.2 Report on the NoE Mobility Program and Assessment of its Results
- D4.1 Report on the Strategy for the Integration of the Research Communities and Creation of a Long Lasting Integrated Research Community
- D4.1 part II Engineering Secure Future Internet Services: A Research Manifesto and Agenda from the NESSoS Community
 - D5.1 Common Body of Knowledge
- D6.2 First Version of the Security Requirements Modelling Language and an Initial Solution for the Scenarios
 - D7.2 Initial Solutions for Secure Service Architectures and Design
 - D8.2 Initial Solutions for Secure Programming Environments and Composable Services
 - D9.2 Initial Solutions for Security Assurance for Services
 - D10.2 Initial Methods for Risk and Cost Aware SDLC
 - D11.2 Selection and Documentation of the Two Major Application Case Studies
- D12.2 <u>First Report on the Dissemination and Communication Activities including the</u> Population of the Dissemination Web Portal
 - D14.3 Report on First industry/research seminar, and on ongoing standardization

Year 2

- D1.3 NESSoS Joint Virtual Research Lab
- D2.3 Second release of the SDE for Security-Related Tools
- D3.3 Report on the NoE Mobility Program and Assessment of its Results
- D4.2 part I Report on the Cutting-Edge Activities, Alignment and Integration with Relevant European and International Activities and Release of the Research Roadmap
- D4.2 part II Engineering Secure Future Internet Services: A Research Manifesto and Agenda from the NESSoS Community
 - D5.2 Identification of Research Gaps in the Common Body of Knowledge
- D6.3 <u>First Version of the Report describing the Methods and Analysis Techniques along</u> with Prototypical Tools for Methodology Support
 - D7.3 Prototypes supporting secure service architectures and design
 - D8.3 First version of improved programming environments (including tools and

prototypes) to support security

- D9.3 Initial Prototypal Support for Security Assurance for Services
- D10.3 Prototype Tools to Support Risk and Cost Analysis
- D11.3 Initial version of two case studies, evaluating methodologies
- D12.4 Annual Upgrades of Dissemination and Communication Deliverable
- D13.1 <u>First report describing the first annual summer school and the annual open</u> competitions
- D13.2 Report describing the curricula for a master in Security Engineering for Future Internet Services and the co-tutela program setup
 - D14.4 Report on Second industry research seminar and on ongoing standardization

Year 3

- D1.4 NESSoS Joint Virtual Research Lab
- D2.4 Second Release of the Method and Tool Evaluation
- D3.5 Report on the NoE Mobility Program and Assessment of its Results
- D4.3 part I Final Report on the Cutting-Edge Activities, Alignment and Integration with Relevant European and International Activities and Release of the Research Roadmap
- D4.3 part II Engineering Secure Future Internet Services: A Research Manifesto and Agenda from the NESSoS Community: Final Release
 - D5.3 Assessment of the CBK also through open consultation
- D6.4 <u>Security requirement patterns for Future Internet applications, and improved</u> modelling of the scenarios
 - D7.4 Enhanced set of solutions supporting secure service architectures and design
 - D8.4 Update of research results
 - D9.4 Enhanced Set of Solutions for Security Assurance for Services
 - D10.4 Enhanced Methods for Risk and Cost Aware SDLC
 - D12.5 Annual Upgrades of Dissemination and Communication Deliverable
- D13.3 <u>Second report describing the second annual summer school and the annual open competitions.</u>
